## Florence 2010 Meeting Trip Report

### Strong Attendance and Contributions Kick Off the New Year

Wow, what an amazing start to this year! We are coming out of this meeting with six approved TRs- including our first major energy management guidelines (TR-202), one white paper, one new tutorial and the launch of the [Broadband Forum Certification Program](#). To all the editors and contributors- thank you all for your hard work!

- TR-105: ADSL2/2plus Functionality Test Plan
- TR-106 Amendment 4: Data Model Template for TR-069 Enabled Devices
- TR-181 Issue 1: Device:1 Data Model for TR-069
  - \* Existing device data model previously defined in TR-106
- TR-142 Issue 2: Framework for TR-069 enabled PON Devices
- TR-167: GPON-fed TR-101 Ethernet Access Node
- TR-202: ADSL2plus Low-Power Mode Guidelines
- MR-238: Use of MPLS in LTE (white paper)
- MR-234 MPLS in Mobile Backhaul

We are pleased to announce the continued collaboration with FSAN, which has now resulted in a new working group being formed from the GPON Interoperability & Conformance Testing Task Force. The Chairs of the Task Force, Regis Coat of France Telecom and Alessandro Capurso of Telecom Italia, will Co-Chair the new Working Group.

Members can self-subscribe to the new WG distribution list:
